MEMORANDUM FOR: Chief, Ballistic Missiles and Space Division, OSI

ATTENTION: [REDACTED] Technical Support Branch

THROUGH: Chief, Requirements Branch, Reconnaissance Group, CGS

FROM: Chief, Photographic Intelligence Division, CIA

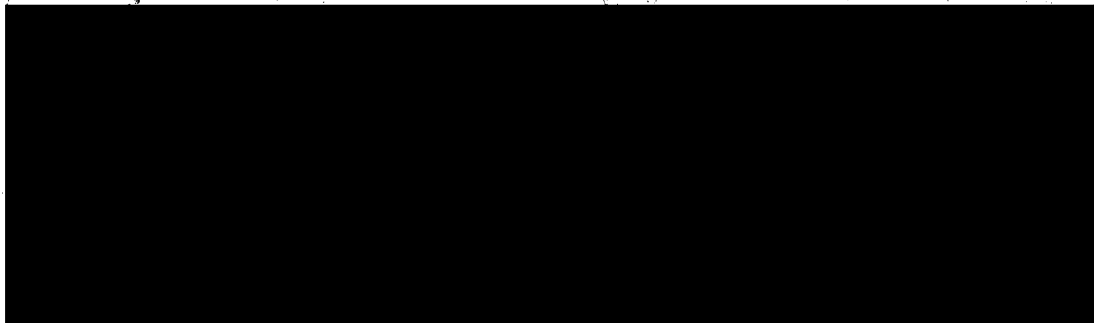

SUBJECT: Azimuth of Guidance Facilities at Launch Complex B, Tyuratam
Missile Test Center, USSR

REFERENCE: (a) Requirement C-SI-5-82,180
(b) CIA/PID Project 30119-5

1. This memorandum is in response to your requirement dated 12 January 1965 which requests computation on eight separate KEYHOLE coverages of the azimuth of an imaginary line connecting the three domes at the guidance facilities for Launch Complex B, Tyuratam Missile Test Center.

2. The desired azimuths were taken from unrectified positive film chips and therefore have not been corrected for obliquity. In all cases, however, the variation of an individual measurement from the average of all azimuths taken was in the direction expected, taking into consideration the placement of the facility on the photographic frame.

25X1D 3. The following is a tabulation of the computed azimuths.

GROUP 1
Excluded from automatic
downgrading and
declassification
